

Manufacturing Lead

Company Overview

Gastronomous is a fast-paced, dynamic company focused on revolutionizing the quick-service restaurant (QSR) industry. Gastronomous realizes the “Kitchen of the Future” through advanced industrial automation techniques and cutting-edge technologies. This is just the beginning! Gastronomous is developing a network of interconnected, IoT-enabled, smart machines for some of the world’s largest QSR brands. We are focused on bringing two revolutionary products to market (lead customers secured) while continuing to develop new solutions. [Click here](#) to see our team in-action.

We are a no-nonsense team of passionate people with a bias for action. We know that our ability to execute on our ideas is what sets us apart. We do what we say we are going to do, externally and internally. We trust our people to act independently and make practical, real-world decisions.

If you are passionate about developing meaningful technology that creates meaningful solutions, then Gastronomous is the place for you! By joining our team, you will be immersed in a dynamic and thought-provoking environment that tests your capabilities and pushes you to new heights.

Gastronomous is looking for an experienced **Manufacturing Lead** oversee and actively engage in the setup and continuous improvement of our manufacturing processes. This role is crucial for someone who thrives on the shop floor, directly setting up processes, implementing them, and refining them to ensure efficient and high-quality production.

What You’ll Do:

- **Assembly Line Setup:** Establish and optimize assembly lines for efficient workflow.
- **Documentation:** Develop and maintain assembly documentation for internal use and for vendors, ensuring all processes are clearly defined and accessible.
- **Health and Safety:** Implement and oversee health and safety policies, ensuring a safe working environment for all employees.
- **Quality Control:** Manage and improve quality control measures to maintain product standards and minimize defects.
- **Training and Development:** Train production staff on new processes and technologies, and continuously develop team skills to meet evolving production needs.
- **Inventory Management:** Oversee inventory levels, order supplies, and manage materials to ensure seamless production flow.
- **Troubleshooting and Problem Resolution:** Quickly address and resolve any production issues or bottlenecks to maintain continuous production cycles.
- **Equipment Calibration and Maintenance:** Regularly calibrate and maintain production equipment to ensure optimal performance and minimize downtime.
- **Process Improvement:** Continuously seek and implement improvements in reliability and efficiency of the production process.
- **Vendor Collaboration:** Communicate regularly with vendors to discuss product specifications, improvements, and ensure compliance with quality standards.

Knowledge, Skills, and Abilities for Success:

- Proven experience in manufacturing operations, preferably in a technology or automation environment, with a hands-on approach to process implementation.
- Proficiency in Mandarin is beneficial, but not required.
- Strong proficiency in Office 365
- Strong proficiency and experience designing in CAD software such as SolidWorks
- Strong understanding of assembly line management, process documentation, and quality control principles.
- Excellent leadership and communication skills, with the ability to effectively manage and motivate a team on the shop floor.
- Critical thinking and problem-solving skills, with a continuous improvement mindset.
- Ability to work collaboratively with vendors and cross-functional teams to enhance product quality and efficiency.
- Bachelor's degree in Manufacturing Engineering, Industrial Engineering, or a related field is preferred.

Soft Skills:

- Must be able to communicate thoughts and ideas effectively.
- Must be able to work independently and with a multidisciplinary team.
- Organized and efficient, able to self-manage projects and present deliverables on time or communicate delays.
- Detail oriented with regards to machine development
- Ability to work in a collaborative team environment and effectively communicate complex technical concepts.
- Strong problem-solving skills, attention to detail, and a passion for creating innovative robotics solutions.

This role is fully in-person at our office in Oakville.

This is an intense, multi-disciplinary role with massive opportunity for growth. It is geared towards someone who is hands-on, able to multitask, and looking to make a big impact.

This is a full-time position with a competitive salary and benefits package. If you are passionate about robotics and have a strong desire to build products of the future, please apply today.

We look forward to reading every application and welcoming a new, bright mind to Gastronomous shortly!
